

## Annex A

- This chart shows how the deprivation scores within the local authority compare with those of the rest of Wales.
- The rectangle represents all the scores in Wales ranked in order from the highest (most deprived) at the top to the lowest (least deprived) at the bottom.
- The shaded bars represent the overall deprivation scores of the local authority's LSOAs.
- A concentration of shaded bars near the top of the rectangle implies that the local authority has higher levels of deprivation than the rest of Wales, and a concentration near the bottom implies lower than average levels of deprivation.

The set of charts on the following page provides a glimpse into how the spread of deprivation varies within local authorities in Wales and how they compare with each other.

It can be seen the overall deprivation levels are:

- Very high in:
  - Merthyr Tydfil
  - Blaenau Gwent
- High in:
  - Carmarthenshire
  - Neath Port Talbot
  - Rhondda Cynon Taf
  - Caerphilly
  - Torfaen
- Reasonably every distributed in:
  - Isle of Anglesey
  - Conwy
  - Denbighshire
  - Flintshire
  - Wrexham
  - Pembrokeshire
  - Swansea
  - Bridgend
  - Cardiff
  - Newport
- Low in:
  - Gwynedd
  - The Vale of Glamorgan
- Very low in:
  - Powys
  - Ceredigion
  - Monmouthshire
